### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The prior art does not show nor suggest a self-resonant RF circuitry within a multilayered low temperature co-fired ceramic substrate having a series resonant impedance structure as recited in claim 1, lines 12-25, "wherein one of said, first, second plurality of intermediate ceramic tape layers includes...such that said inductance and said capacitance together form a series resonant impedance at a predetermined frequency of resonance," in conjunction with the specific connections among interface electrodes, circuit electrodes, electrode patterns, conductive paths in different ceramic layers. Claim 8, lines 12-25, and claim 15, lines 12-27, contain the similar limitation as recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
